European News Discouraging and Liberal Selling Meets With Feeble Resistance.

Tuesday Afternoon. Aug 2.

After the temporary recovery in prices following a condition report which was slightly lower than expectations the cotton market today returned to its state of weakness, aggravated by developments in Europethat stimulated pessimism afresh. The breaking of the conference between the Poles and the Bolsheviki, this arousing fears of the war clouds spreading and again setting affame the fires which have been smoldering for some time, was one of the chief factors. It had depressing effect on the foreign exchange markets and was reflected in weakness of the American stock markets. Cotton shared in it, sithough there was increase in the number of complaints as to how the crop is faring, due to more activity on the part of the weevil and the worms. The latter pest in portions of the Memphis district is said to be playing havoe.

At the close the list in New York was easy and 100 to 57 points not to the bad, while in New Orleans finals were steady and fro mile to 45 points off.

the near positions were steadier than

the feeling as to the general situation the feeling as to the general situation and outlook. Finals were steady and from 4 to 25 points down. Private cables had little to say regarding sentiment, but it was evident that the unrest on the continent did not help matters and sales were 7.900 bales. Receipts were, some the continent did not help matters and the continent did not be retained.

Added to the uneasiness over the domestic money situation, and some advices said that selling was along done by the Southwest dealers of the prospect for getting continential affairs somewhat settled was more concern over the domestic money situation, and some advices said that selling was along done by the Southwest against roospective receipts. The fact also that cother lost some of its premium seemed to indicate that the early selling and sold only 2555 bales, although reducing quotations 100 points, middling to 38.50. Memphis sold but failed to be retained.

4 to 29 points. NEW YORK COTTON.

NEW YORK. Aug. 3.—The cotton market lost most of yesterday's advances during today's early trading, with both October and December contracts making new low ground for the movement. On the contrary there was reselling by some of yesterday's buyers and considerable selling for Southern and Wall Street account, with the market opening 19 to 45 points lower and becoming very weak later owing to rumors of financial troubles in Georgia and reports from Paris that the Polish armistice negotiations had been halted. December sold down to 23.70c and Jan. to 29.25c with the more active months showing net losses of 80 to 28 points.

Liverpool became a good buyer on the early break and there was a rather sharp raily with December selling up

to 30.30c, or about 60 points from the lowest. Continued selling for Wall street and Southern account checked the advance at this level and the market later was less active with fluctuations irregular. Prices at midday held all but a few points of the rally, however, and there was scattered covering on reports that showers in the South were leading to increased damage by boil weevil.

The market was again upset by active selling of Bethlehem, Baldwin and Corn Products, which fell 25 to 2 points. military plot and are working hand and glove with Bolsheviki.

Increased passenger fares will go into effect August 20, and increased freight rates on August 25. Members of communist labor party including Wm. B. Lloyd, found guilty of conspiracy to overthrow government of United States.

Gen. Terentsky, formerly Russian military attache in Vienna, says a crumbling of Bolshevism from within. He looks for a revolt soon and thinks it will begin among soldiers drafted for labor and will spread throughout mbor masses.

J. P. Morgan & Co., plan new 33 story building to replace Mills structure and to cost 34,000,000.

John A. Toping, head of Republic Iron & Steel Co., believes advance in freight rates will stimulate buying by railroads and will make financing for these purposes comparatively easy. Points out that will undoubtedly increase cost of steel production and will have a stiffening effect on steel status.
